Course Overview

EDRP teaches professionals how to secure data by putting policies and procedures in place, and how to recover and restore their organization's critical data in the aftermath of a disaster.

- The program is developed after a thorough job task analysis and market research
- It is designed and developed by experienced SMEs and business continuity/disaster recovery experts
- A complete vendor neutral course covering business continuity/ disaster recovery techniques and solutions
- Detailed labs for hands-on learning experience

EDRP covers all the relevant knowledge bases and skills to meet regulatory compliance standards such as ISO 31000:2018, ISO 22301:2019, ISO 22313:2020, NFPA 1600, and many more along with the NICE Framework

- The student kit contains a large number of white papers for additional reading
- The course includes case studies for better explanation of concepts
- The program includes templates so that the students get a practical idea on how to perform the various analyses and assessments
