Course Overview

In the accredited ITIL® 4 Specialist Drive Stakeholder Value learning path, you will learn about all types of engagement and interaction between a service provider and their customers, users, suppliers and partners. It focuses on the conversion of demand into value via IT enabled services. This path also covers key topics such as SLA design, multi-supplier management, communication, relationship management, CX and UX design, customer journey mapping, and more. The path will provide you with tools to increase stakeholder satisfaction which is integral to business success in the current competitive landscape. ITIL4 Specialist Drive Stakeholder Value is aimed at practitioners responsible for managing and integrating stakeholders, those that focus on customer journey and experience, and those that are responsible for fostering relationships with partners and suppliers.

Intended Audience

This course is designed for anyone who would like a foundational understanding of IT service management, its key principles and practices, and how it will help you deliver better value to your customers. It is appropriate for all IT staff and management, as well as customers who work closely with IT to support business requirements.

This course is also designed for students who are seeking the ITIL 4 Foundation certification and who want to prepare for the ITIL 4 Foundation exam.

Prerequisites

In order to take this course, you must hold the ITIL 4 Foundation Certification or the ITIL 4 Managing Professional Transition Certification. In order to sit for the exam, you must complete this course and receive the official Letter of Attendance for this course.

Follow-On Courses

- Specialist: High Velocity IT Training
- Strategist: Direct, Plan & Improve
- Specialist: Create, Deliver & Support
