

Leadership Training: Practical Leadership for Technical Professionals

Applied Technology Academy

This three-day course is designed for individuals with experience as an individual contributor or a new technical manager . The course teaches practical skills to be an effective leader in a technology field . It focuses on skills like how to motivate, coach, communicate with, and teach employees to make them more effective in their jobs . The course covers the transition from an individual contributor to a leader, developing and leading a technical team, and leading different types of teams . Additionally, it teaches how to develop a team mission, values statement, and vision to achieve business results .

LEVEL	DURATION	EXPERIENCE	AVERAGE SALARY	LABS
Foundational	3 Days	None	Varies	No

Course Overview

You have developed skills to be successful in the field of technology. In this course, you will learn the practical skills you need to be an effective leader in your organization. Leadership enhances the skills employees at all levels need to be truly successful. When you learn practical leadership skills, you'll have the ability to motivate, coach, communicate with, and teach employees in such a way that they are more effective in their jobs and, as a result, you become more effective in your job.
