

Adobe Dreamweaver CC: Level 2

Course Overview

The skills and knowledge acquired in Adobe Dreamweaver CC - Level 2 are sufficient to be able to work with various advanced aspects of Dreamweaver CC including working with the Creative Cloud, CSS inheritance and specificity, responsive web design, Photoshop integration and much more. It is essential to ensure that websites are compatible with various modern day display devices such as mobile phones, tablets, and smartphones. In this course, you will use Adobe® Dreamweaver® CC to create fluid CSS layouts, implement mobile integration techniques, and share files over a server to work in a collaborative manner.

Target Audience

This course is most valuable for individuals who have been given responsibilities to create or maintain a website. It will also be valuable for new web designers, web developers, and graphic artists who want to extend their skills in creating complete websites. Learning how to use Dreamweaver CC will enable the practitioner to create web pages and sites in the most efficient manner. This course can also be used to help prepare students to take the Adobe Certified Associate (ACA) exam.

Target Audience

Graphic Designer

Web Development

Web Designer

Digital Marketing Manager

Digital Content Designer

Course Objectives

In this course, you will create web pages and organize them into a website.

You will:

- Identify website requirements.
