

Generative AI for Business Professionals (GenAI BIZ)

Course Duration: 1 Day
Exam Reference: GAZ-210

Course Overview

Generative artificial intelligence (AI) is a major milestone in business automation. Despite its recency, it has already had a significant impact on our lives. But, the rapid pace at which generative AI is growing can be overwhelming. And, there are so many facets to this field that it can be difficult to know how to use it effectively to improve the business.

This course is designed to demystify generative AI for business professionals, as well as to trace its power to actionable, real-world business goals. It will give you the essential knowledge of generative AI you'll need to elevate the organization in these exciting times.

Prerequisites

- To ensure your success in this course, you should have a foundational knowledge of business processes and general business concepts.
- You should also have at least a basic understanding of information technology resources and systems, including networks, computers, and other electronic devices used in the enterprise.

Course Objectives

In this course, you will identify ways in which generative AI can bring significant value to the organization. You will:

- Describe the fundamentals of AI and generative AI
- Generate text using AI
- Generate images and video using AI
- Generate audio using AI
